

## ENVIRONMENTAL MANAGEMENT SYSTEM

Environmental Management System will promote and drive forward an ethical response to our Company's role in our industry and within the community we operate and serve.

This must be seen as a joint effort between management and staff in bringing together a whole company approach to the environment and our Company and staff's affect on it.

It is the policy of HEES to manage and operate its business in ways that conserve both energy and natural resources in addition to compliance with all applicable environmental laws and regulations. HEES recognises excellence in environmental management as being amongst the highest of corporate priorities.

Working to and gaining ISO 14001 : 2004 we feel will fulfil these objectives for our Company and show that HEES is committed to maintaining and exceeding our corporate responsibilities to the environment.
